

Watch the Video and measure your shower or tub stall ... follow these simple steps..

1. Mark **Centerline** of Unit on masking tape on with water based marker
2. Determine and Mark the **Max Height** at the top of the unit
3. Measure the wall to wall distance at the **Bottom** of the unit
4. Determine if Threshold is Level or if it Drops
5. Measure the wall to wall distance at **Middle** of the unit
6. Measure the wall to wall distance at **Top** of the unit (at max height)

- 7 (a-b) Left Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
- 7 (c-d) Right Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
8. Is the showerhead on the left wall of unit or on right wall, or both. If rain shower, put note in Comments

Watch the video and record your measurements by the numbers. Include unit information as well, concerning model number, metal finish, glass type, etc.

How to Measure a Neo Angle Stall

Document:
MM.3344
REV. 3/14/17

Follow these simple steps:

- 1 Mark **Centerline** of Unit on masking tape on with water based marker
- 2 Determine and Mark the **Max Height** at the top of the unit
- 3 Measure the wall to joint distance for the **Left Base** of unit
- 4 Measure the joint to joint distance at **Center Base** of unit
- 5 Measure the joint to wall distance at **Right Base** of unit
- 6 (a-b) Determine if Threshold is Level or if it Drops from side to side.

- 7 (a-b) Left Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
- 7 (c-d) Right Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
8. Is the showerhead on the left wall of unit or on right wall, or both. If rain shower, put note in Comments

Record your measurements by the numbers. Include unit information as well, concerning model number, metal finish, glass type, etc.

Model Number:

Metal Finish:

Glass Type:

Handle or Towel Bar Type:

How to Measure a 90° Stall

Scan QR to download this measuring form

Document:
MM.3344
REV. 3/14/17

Follow these simple steps:

- 1 Mark **Centerline** of Unit on masking tape on with water based marker
- 2 Determine and Mark the **Max Height** at the top of the unit
- 3 Measure the wall to joint distance for the **Left Base** of unit
- 4 Measure the joint to wall distance at **Right Base** of unit
- 6(a-c) Determine if Threshold is Level or if it Drops from side to side. Place level at the joint to determine

- 7 (a-b) Left Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
- 7 (c-d) Right Wall: Determine if there is a gap between the wall and level at the top or bottom of the enclosure
8. Is the showerhead on the left wall of unit or on right wall, or both. If rain shower, put note in Comments
